

# WACKY SCIENCE

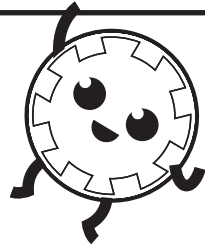

Color in the scene of Tate, Tot  
and Trumint in the SLIME lab!

# SLIME SQUARES

Grab a buddy and take turns drawing lines between dots to make boxes.  
When you finish a box, put your initials inside to claim it.  
When no more boxes can be made, whoever has the most wins!  
Squares with SLIME are worth 2 points.

A large grid of 12 columns and 10 rows of dots for drawing boxes. The grid is partially obscured by a large, wavy, hand-drawn shape that resembles a slime puddle. Inside this puddle, there are four small, starburst-like shapes. The grid is intended for a game where players draw lines between dots to form squares.

# SLIMY SUDOKU

Fill the squares so each number 1–4 appears only once in its row, column and section. For an extra hard challenge, try the big version with numbers 1-9!
